The Need for Training

This is an essential course for all those involved in the care of women and their babies who need to understand how recent developments in the legal and regulatory landscape will impact on their scope of practice.

Five Years of Cerebral Palsy Claims is a detailed analysis of clinical and non-clinical themes from cerebral palsy claims, with an aim of disseminating shared learning and highlighting areas of improvement. In the last Annual Report by NHS Resolution maternity claims accounted for 50% of the total value of claims in the NHS – a year-on-year trend. With litigation costs increasing, learning from past incidences to prevent harm has never been more paramount.

Course Content

This unique one-day course focuses on the following important elements of clinical negligence and new case law for maternity teams:

- Five Years of Cerebral Palsy Claims – key findings
- NHS Resolution Response to 'Five Years of Cerebral Palsy Claims' Report
- Consent to treatment issues in Maternity claims
- The Patient's Perspective
- The Clinician's Perspective
- Why does intrapartum management remain a fundamental issue in so many cases?
- Personal Accountability & Whistleblowing

Speakers Confirmed (So Far)

Dr Michael Magro – Former Darzi Fellow, NHS Resolution, and Author of the *Five Years of Cerebral Claims* report.

James Badenoch QC - 1 Crown Office Row.
James was counsel in the landmark case of *Montgomery v Lanarkshire Health Board* [2015] which has huge implications for the way the law deals with consent.

Tora Clark-Ward - Risk & Governance Midwife at Rosie Maternity Hospital, and soon to join the Healthcare Safety Investigations Branch (HSIB).

Course Director

Mr Majid Hassan

Partner in Clinical Law
Capsticks Solicitors LLP

Course Aim

The aim of the study day is to provide an understanding of the main trends in obstetric incidences; setting a context following the 'Five Years of Cerebral Palsy Claims' report, lessons learned and strategies for implementation into practice to improve outcomes for mother and baby, and the clinical team.
