Course Outline

Aims

This is an essential course designed to provide hands-on ultrasound instruction and training relevant to the care of women at risk of preterm birth, growth restriction, and stillbirth.

Objectives

- To provide a theoretical basis for the use of ultrasound in the prediction and prevention of adverse outcomes associated with preterm birth, growth restriction, and stillbirth
- To demonstrate and instruct in ultrasound skills relevant to these conditions, in particular:
 - Uterine, umbilical, and fetal Dopplers
 - Transvaginal scan assessment of the cervical and internal os
- To guide appropriate application and interpretation of these skills and findings within the clinical setting

Course Content

This unique one-day course focuses on the following:

- Normal ultrasound appearances, measurements and reports
- Identifying the SGA/FGR fetus using ultrasound
- Implications of asymmetrical / symmetrical FGR
- Customised and population-based growth charts
- Placental, amniotic fluid, and Doppler parameters
- Transvaginal scan assessment of the cervix and internal os
- Appropriate interventions

All clinical staff with an interest in preterm delivery and the management of small babies; Heads of Midwifery, Midwifery Sisters, Sonographers, Screening Coordinators, Improvement Leads (those who are part of the Maternal and Neonatal Health Safety Collaborative or who are implementing the Saving Babies Lives Care Bundle), O&G Consultants and Trainees. Basic scanning experience is desirable, but not essential.

Course Director

Mr Nigel Simpson

Senior Lecturer in Obstetrics & Gynaecology, University of Leeds

Honorary Consultant Obstetrician and Gynaecologist, Leeds Teaching Hospital NHS Trust

Lead for NIHR Clinical Research Network for Reproductive Health & Childbirth

Feedback

100% of delegates rated 'Very Good' or 'Excellent' for overall **quality of education**

90% reported that they would **consider or intended to modify practice** after seeking more information

*"This course is **perfect** for learning needs of O&G trainees RCOG curriculum. **Much needed and perfectly pitched**, would **highly recommend**."*
