See Website for Details

For **midwives**, **neonatal nurses** (including nurse practitioners), **trainee doctors** in paediatrics and **general practitioners** (including GP registrars in training), and legal professionals.

This course is not a certification on its own to perform checks. It is a CPD course for those interested in performing checks, or those that already do.

The Need for Training

A routine physical examination is an integral part of postnatal care for new-born infants, repeated at 8 weeks of age. The UK National Screening Committee (NHS Newborn & Infant Physical Examination Programme) has established a core set of screening outcomes for the examinations identified as congenital heart disease, developmental hip dysplasia, congenital cataract and undescended testes.

Routine examination also seeks to identify infants who are unwell or at risk of developing problems by recognition of clinical symptoms & signs and identification of risk factors.

Course Directors

Dr Abhimanu Lall

Consultant Neonatologist, Great Ormond Street Hospital for Children NHS Foundation Trust

Professor Simon Mitchell

Consultant Neonatologist, Manchester University NHS Foundation Trust

The course is taught by experienced experts in the relevant specialties (i.e. ophthalmologists, orthopaedic surgeons, paediatric urologists, and neonatologists).

Course Content

As well as covering the screening priorities set out by NIPE, this course also provides an overview of common clinical problems presenting in infancy with an emphasis on the early recognition of infants at risk and their appropriate management.

Content includes:

- Congenital cataract & new-born eye examination
- Screening for developmental hip dysplasia
- Screening and detection of congenital heart disease
- Examination of the testes and groin
- Common abnormalities found on the routine new-born examination
- Clinical problems presenting in infancy
- Neonatal Surgical Emergencies
- Detection of Cardiac Murmurs

Feedback

96% of delegates rated 'Very Good' or 'Excellent' for overall **quality of education**

95% reported that they would **consider or intended to modify practice** after seeking more information

"One of the best study days I have been on, particularly relevant for me."

*"Thank you, an **absolutely brilliant study day** – I have been performing NIPE for 13 years, but have still taken away thoughts of how I will alter my practice."*

*"**Fantastic teaching.** Amazed by the content and knowledge of the lecturing."*

*"Today I have watched and listened to four amazing paediatric consultants talk with passion about the amazing things they diagnose and treat in the smallest of babies. I'm in **absolute awe...** and feel humbled to have learnt from them!"*
